

## Joining Hands to Move Forward Confidently

Resolution of the Peace 50 community

We call upon women of all nations to join efforts in preserving peace and creating a better future for rising generations. Women must continue to inspire and serve as models of leadership and collaboration toward the achievement of peace.

A woman is the heart of humanity, a prevailing source of a 'soft power' based on unconditional love including love for her children and those closest to her, for her nation and for the world.

Through collaboration women can find solutions to global problems. The Peace 50 community proposes a uniquely constructive and active approach based on horizontal international communication and alliance building.

We resolve, therefore to be guided by the following P50 principles:

- 1. Unity** – The union of women from varying countries and fields of industry, profession and activity, to establish diversity of membership and thought. The community is interested in expanding its membership. The more powerful, socially responsible, active and caring women there are joining hands through the community, the more the voices of women are elevated and ideas manifested. Many global problems can be solved not only at a political level but also at a civil one. The more representatives of different countries join the community, the stronger the intercultural communication bridge will be.
- 2. Communication** – Dissemination of ideas and proposals at the horizontal communication level. Interaction of the Peace 50 members within the community is based on their informal friendly cooperation, human relationships, and shared values and ideals. That makes it possible to form intercultural dialogue 'from heart to heart' and to achieve real sustainable results.
- 3. Activity** – We resolve to actively fulfill socially important projects. The core requisite for P50 community membership is not social status or financial situation of a woman but the establishment of purposeful initiatives and actions reflecting her inner potential. The community members are women leaders, experts, and socially active.

4. **Assembly** - Live communication and the free exchange of ideas is an integral part of the P50 activities. We convene the annual Summer Peace Summit as the annual global meetings for the community. Members meet to share their project progress, to enrich one another with ideas, and to experience the creative energy that stems from communication with the like-minded. The annual summit is a creative atmosphere, wherein we aim to identify solutions to address global problems.

As members of the Peace 50 community, we further resolve to maintain individual, personal connections and communication. We aim to offer our selfless support to one another in the spirit of solidarity and friendship.

Finally, we resolve to offer our policy and procedural recommendations to the political and professional leadership in the nations where we live and serve toward the achievement of global peace.
